

The crew includes Browser Stack, GitHub, Jira and fellows makes it the right tool.

Manage your entire testing and requirements in one place, no more juggling between different tools.

FrothAi — Effortlessly Write Test Cases from Requirements using **Artificial Intelligence**, Even on Your Busiest Days.

Hello, We Are Your Testing Partner

FrothTestOps is a software application that helps you effortlessly coordinate and monitor manual and automated testing. FrothTestOps provides collaborative management tools, seamless data export, and comprehensive requirement management. It also allows you to define and manage testing requirements and create comprehensive test scenarios

Benefits Of Testops

- ◇ Effortless coordination and monitoring of manual and automated testing
- ◇ Collaborative management tools
- ◇ RPA-enabled test automation
- ◇ Seamless data export
- ◇ Comprehensive requirement management
- ◇ Improved efficiency and accuracy
- ◇ Reduced costs
- ◇ AI-driven test insights

Our Customer Types

Small and Medium-Sized Businesses with Growing Development Teams

Software-as-a-Service (SaaS) Companies

Test Automation Newcomers

SIMPLIFIED TEST MANAGEMENT

Create and Manage Test Scenarios & Cases. Import, Export, and Download Templates. Get "Pre-Condition" Option for Seamless Test Case Creation

POWERFUL TEST LAB

Plan and Execute Both Test Plan & Test Cycle for Efficient Testing. Get Real-time status updates by Assigning Testers and tracking progress for better collaboration. Automate Testing with Script and Suite Creation to Reduce manual effort and improve accuracy.

AUTOMATION

Automate web and mobile testing with record and play functionality, and streamline API testing and use RPA to handle repetitive tasks. Schedule test executions and receive detailed, auto-generated reports via email all with minimal manual intervention.

With TestOps, testing teams can effortlessly

- ✧ Collaborative Management
- ✧ Seamless Data Export
- ✧ Comprehensive Requirement Management
- ✧ Detailed Test Scenarios
- ✧ REST API automation and execution
- ✧ Automation with Record-and-Play
- ✧ Manual test case execution and reporting
- ✧ Schedule Execution and generate Automated Reports
- ✧ FrothAI: Effortless Test Case Creation from Requirements
- ✧ Test Plan Approval and Sign-off for Seamless Deployment
- ✧ REST API automation and execution
- ✧ Link and Manage Your Defects Efficiently

**Is this an announcement,
Nah! we contradict,
TestOps makes it happen.**

Create and store reusable test case templates to optimize your workflow and boost efficiency.

Detailed Test Scenarios

With TestOps, you can create comprehensive test scenarios that outline the necessary steps to validate specific application functionality or features.

Custom Test Reports

Create personalized test reports with TestOps, ensuring that your test coverage, references, and statuses are always up-to-date.

Seamless Attachments

TestOps simplifies the attachment process for various fields, enabling you to include essential information effortlessly.
